

SeCube USA Releases the Cube1 "Vehicle Black Box" Mobile DVR System

Designed for vehicle installations, Digital Video Recorder features a Dual video camera, GPS module & G-Sensor that performs High-quality video and Data recording.

SPRINGBORO, OH – February 24, 2010 – SeCube USA announces the launch of the "Vehicle Black box" line of Mobile Digital Video Recorders (MDVR) for use in taxi cabs, buses, patrol cars, commercial fleets and other public and commercial vehicles.

The Cube1, the first product of this innovative line of mobile recorders is a state of the art mobile DVR which offers a perfect array of features starting with the dual 1.3 Mega Pixels camera that faces forward and looks into the car recording images both inside and in front of the vehicle. The system can perform continuous and event recording which is stored on a solid state SD memory card that can be expanded up to 32GB.

The Cube1 mobile DVR features a built-in G-force sensor with 5-level settings that can record multiple impact points i.e. shock, acceleration and deceleration. Supporting software intended to analyze driver habits and promote safe vehicle operation.

Another exciting feature of the Cube1 DVR is a built-in GPS module that records exact location, speed and direction of the vehicle. This GPS information is integrated with Google maps. The Cube1 viewer can simultaneously play back video, audio, sensor, and GPS data through this software program.

When used to its full potential, the "Vehicle Black Box" Mobile DVR is an effective tool that will limit liability, document incidents and condition drivers to drive safer and take better care of the vehicles to reduce expenses. Other products of this line, Cube2 and Cube6 are announced to be released in April of 2010.
