

SeCube USA Releases the S-Series Standalone DVR Systems

The low-profile S-Type Series Standalone DVR Systems offer enterprise – level features of SeCube ET and ST Series systems at a lower cost.

SPRINGBORO, OH – October 31, 2008 – SeCube USA releases an economical S-Type addition to its recognized SeCube line of advanced Standalone Digital Video Recorders.

The new S-Type Series Standalone DVRs design features a smaller case and a lower price with no sacrifice to the recognized quality of SeCube Digital Video Recorders. New systems come with all features of ET and ST Series models such as enhanced MPEG-4 compression, 4 / 8 camera inputs, up to 120fps / 240fps for recording and viewing, motion detection as well as advanced networking capabilities.

S-Type Standalone DVR Systems provide for simultaneous Live Viewing, Recording, Playback, Backup, and Remote Network Viewing. Cameo Live / Playback function allows performing Live Monitoring and Playback on a same screen. The systems support dynamic and static IP, and the enhanced MPEG-4 compression ensures the fastest transmission possible over allowable bandwidth.

The S-Type DVR user-friendly control interface enables users to implement various DVR management procedures via VCR-like front panel keys, a remote IR controller, or a USB mouse. Front USB ports allow connecting various external devices like mouse, memory stick or external USB HDD. The system can record continuously or based on individual camera schedules, motion, and sensor input. Each camera can be set individually for resolution, compression, frame rate, and recording events. Pan/Tilt/Zoom control allows managing multiple PTZ cameras locally and from remote locations.

The included multi-site enterprise-level remote System Management Software (SMS) provides for multiple system video monitoring, status, eMapping, configuration, and backup. Remote Live viewer software supports up to 64 camera views from multiple DVR servers.

The new S-Type Series SeCube Digital Video Recorders deliver the very best value in user features, reliability and affordability for digital surveillance in education, retail, hospitality, business parks as well as for residential use.
