

## **SeCube USA Releases the SST-400 Enhanced MPEG4 Standalone DVR System**

*The compact 4-camera digital video recorder offers advanced functionality and superb image quality in a low profile slim case.*

SPRINGBORO, OH – March 18, 2009 – SeCube USA releases a new addition to its well-known SeCube line of advanced Standalone Digital Video Recorders.

The new SST-400 4-camera Standalone Digital Video Recorders come in a compact (11.8in x 7in x 1.3in) slick case with no sacrifice to the recognized quality of SeCube digital video surveillance products. The SST-400 systems feature an embedded Linux operating system for superior stability, 4 camera inputs, one audio channel, 120fps rate for recording and viewing, motion detection as well as advanced networking capabilities.

As all Secube Standalone DVR Systems, the SST-400 model provides for simultaneous Live Viewing, Recording, Playback, Backup, and Remote Network Viewing. Cameo Live / Playback function allows performing Live Monitoring and Playback on a same screen. Enhanced MPEG-4 compression ensures the fastest transmission achievable over allowable bandwidth.

The SST-400 user-friendly control interface enables users to implement various DVR management procedures via a remote IR controller and a USB mouse. Front USB ports allow connecting various external devices like mouse, memory stick or external USB HDD. The system can be configured to record continuously or based on individual camera schedules, motion, and sensor input. Each camera can be set individually for resolution, compression, frame rate, and recording events.

The included remote System Management Software (SMS) provides for multiple system video monitoring, status, eMapping, configuration, and backup. Remote Live Viewer software supports up to 64 camera views from multiple DVR servers.

The new SST-400 SeCube Digital Video Recorders deliver the ultimate value in terms of user features, reliability and affordability for digital surveillance in education, retail, hospitality as well as for residential use.
